

Process Director

One Solution

Total Control

Tungsten Process Director delivers a Comprehensive Solution for all SAP Enterprise Workflows

Every leader working with large-scale SAP deployments understands the complexities of syncing up every process in the value chain. Some of these common challenges include:

Lack of Visibility:
A fragmented view of workflows limits control, making it difficult to measure performance and evaluate strategies.

Slow Processing:
Relying on manual processes introduces delays and potential business risks.

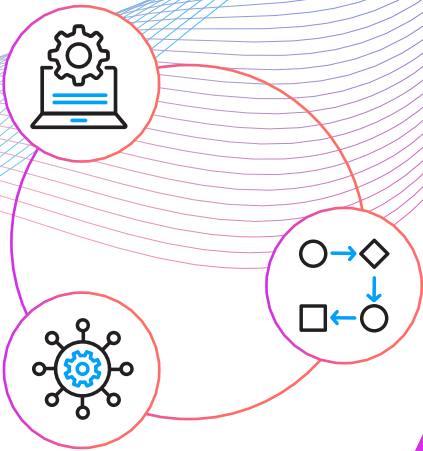

Lack of Adaptability:
Adjusting workflows within SAP can be a complicated and time-consuming process.

Disparate Tools:
Juggling various automation platforms complicates compliance and future-proofing strategies.

The Solution

Process Director is a comprehensive, SAP-integrated platform that unifies and streamlines a wide range of business processes. For example, it provides over 95% touchless invoicing through its integration with InvoiceAgility. As a standalone solution, it delivers end-to-end workflow automation and real-time insights, helping all departments maximize their SAP investment.

Features of
Process Director

Deep SAP Integration:
Operate within your existing SAP infrastructure, using standard interfaces. This means no core SAP code changes, and you can work directly in your system using either the familiar SAP GUI or the intuitive Fiori web interface.

Dynamic Workflow Automation:
Automate postings, initiate workflows, and perform extensive, configurable validation checks against SAP, streamlining operations across departments.

Integrated Document Lifecycle:
Leverage our strategic partnership with Zia to transform your document archiving from basic storage into an AI-powered, enterprise-grade content management solution.

Comprehensive Audit Trails:
Our solution provides an in-depth record of transactions and changes for robust compliance and transparency across all processes.

Centralized Control:
Unified process automation solution that provides a single point of visibility and control for enterprise teams.

Benefits of
Process Director

Strategic Business Transformation:
Move beyond traditional processing by converting technological investments into intelligent, adaptive capabilities that drive real competitive advantage across your entire organization.

Operational Efficiency Acceleration:
Compress complex business processes, eliminate manual bottlenecks, and redirect team energy from transactional tasks to strategic initiatives that generate tangible business value.

Enterprise-Wide Insights Generation:
Transform raw data into actionable intelligence, providing leadership with comprehensive visibility that enables faster, more informed decision-making across multiple business functions.

Risk and Compliance Optimization:
Convert regulatory requirements from a cost center into a strategic opportunity, using intelligent document management to proactively mitigate risks and ensure organizational resilience.

Whether you're tracking goods receipts, managing procurement documents, or managing master data, Process Director's deep integration with SAP delivers a flexible, enterprise-grade solution that can adapt to your unique business goals.

Are you ready to transform how your organization manages, routes, and archives critical business documentation?
