

# Any Invoice, Any Format, Anywhere.

Discover how Tungsten InvoiceAgility makes life simpler for your accounts payable (AP) team with touchless invoicing.

## For fast-moving businesses, back-office efficiency is key

No matter where you go in the world, businesses are facing challenges that are getting in the way of their efficiency. Do any of the following sound familiar to you?

### Compliance complexity

Worldwide e-invoicing mandates have created a diverse and complex network of rules and regulatory differences, while increasing pressure on businesses to implement digital AP processes.

### Supply chain disruption

Increased fragility within supply chains leading to increased supply chain costs – businesses are looking for ways to reduce uncertainty, increase visibility and simplify operations.

**61%**

of businesses say supply chain visibility will be crucial to operational success<sup>1</sup>

### Cash flow

Poor liquidity management is the biggest factor in business failure. CFOs need to ensure there is working capital, with AP and Accounts Receivable (AR) visibility and efficiency essential to deliver this mission.

### Supplier relationships

Cost and geopolitical pressures straining supplier relationships, with more late payments and extension of payment terms – reducing the impact of these can help to support better, more profitable and reliable relationships through the supply chain.

**26%**

of CFOs are looking to optimize cash flow management<sup>2</sup>

## Simplify accounts payable with AI-powered invoice automation

As an integrated e-invoicing network and invoice capture solution, InvoiceAgility gives you the power to simplify accounts payable (AP). With powerful AI automation working behind the scenes, it's ready to help you enhance how you support compliance, efficiency and accuracy at your organization.

Built on the industry's largest e-invoice network, InvoiceAgility gives you a solid foundation for touchless, straight-through processing for incoming invoices.

### Some of the benefits include:

Over 99% automated invoice processing

Reduced invoice approval time from days to minutes

Cross-region business and regulatory compliance support

## At a glance: Why choose InvoiceAgility?

### Comprehensive invoice support

Handle all invoice types, such as e-invoices, paper invoices or pdf invoices, whether they arrive from the PEPPOL network or other industry networks.

### Accuracy and compliance

Automatically ensure every invoice is accurate and compliant with tax and business rules.

### Complete AP visibility

End-to-end data validation, tax compliance, supplier visibility and financial insight no matter the format.

## InvoiceAgility: AP processing fit for modern, global business

As an AI-powered integrated solution, InvoiceAgility ensures your AP teams can accept any invoice format from anywhere. It's ready to drive your AP accuracy by up to 99% while accelerating invoice approvals, improving cashflow and reducing manual processing.

- 1 Faster invoice processing**  
InvoiceAgility accepts all formats, currencies and languages in one solution.
- 2 Improved accuracy over time**  
Our advanced OCR continues to improve our Touchless Invoice Automation which enhances invoice processing and matching invoices.
- 3 Touchless automation**  
Powerful low-code tools enable you to define customized processing rules, so you can implement the system and leave it to work.
- 4 ERP integration**  
InvoiceAgility can easily integrate with ERP systems (like SAP and Oracle), so you can align resources and compliance with your evolving business needs.
- 5 Global compliance**  
Ensure global compliance certainty with seamless validation and reporting in over 140 countries (and growing), that adapts to regulatory changes.
- 6 Access over 350,000 suppliers**  
InvoiceAgility connects to a huge network of suppliers, with built-in processes for standards like PEPPOL, simplifying supplier relationships and compliance.

## Reaching touchless invoicing

Wondering how you can achieve full automation? It's important to remember that achieving it is a process. You'll need to have a clear plan to get there, and that starts with understanding the power and potential of InvoiceAgility's Seamless Data Extraction and Intelligent Data Validation capabilities.

Only **5%** of mid-sized firms have fully automated Accounts Payable, Receivable<sup>3</sup>

Thankfully, InvoiceAgility can help.

## Seamless data extraction

### Buyer ID

Automatically link invoices to the right department to avoid misrouting and simplify invoicing.

### Supplier identification process

Support precise supplier matching, cut out errors and drive efficiency.

### Identify and route

Get invoices to the right place with automatic document classification, eliminating manual sorting while ensuring compliance.

### Data verification

Ensure invoice data is formatted correctly for ERP systems, reducing data validation issues and unnecessary workflows.

### Continuous learning

InvoiceAgility is always improving recognition data accuracy and making data extraction and processing more accurate over time.

## Intelligent data validation

### Invoice pairing automation

Automatically connect your invoices to purchase orders (POs), cutting verification time for high-order businesses while ensuring accuracy and catching discrepancies early, simplifying the process for complex supply chains.

### Account coding suggestions and verification for non-PO invoices

Invoice data and historical pattern analysis recommends ledger code, lowering manual effort in coding complex invoices. Additionally, categorization code comparisons through defined rules and historical data can improve invoice allocation accuracy without a PO.

### Granular system verification

InvoiceAgility can verify down to line level, providing you with the ability to process thousands of line items for a single invoice.

### Detailed invoice matching

InvoiceAgility uses two and three-way matching to verify price, quantity and receipts, reducing the risk of overpayments and duplicates.

## 90% is the minimum, shifting to touchless invoice processing should be the ambition

Driving towards touchless invoicing can help you transform AP processes at your organization. Your journey can begin with the power of InvoiceAgility. It's ready to seamlessly integrate with your back-office systems, including Oracle, SAP, Microsoft Dynamics 365, Coupa, and more.

With its built-in adaptability, InvoiceAgility gives you a reliable solution for a range of data formats and comms protocols. While its pre-trained knowledgebase ensures fast identification and data extraction, which work in tandem with its ability to tailor validation rules for quick processing.

No matter where you operate, InvoiceAgility's country-specific compliance tools simplify validation and reporting across compliance and regulatory environments.

**That's why InvoiceAgility's comprehensive set of AP features is a robust and scalable foundation for you to achieve touchless invoicing.**

**68%**

of Fortune 500 are customers

**140**

countries where we are processing invoices compliantly – and that number is growing!
