STREAMLINE
SHIPPING DOCUMENTATION

COMMERCIAL INVOICES, BILLS OF LADING, COAs, EXPORT LICENSES...
GLOBAL SHIPPING DOCUMENTS CONTAIN INFORMATION
INDISPENSABLE TO YOUR ORGANIZATION.
AUTOMATION UNLOCKS THE VALUE IN THIS DATA, HELPING YOU MANAGE
OPERATIONS, DISSEMINATE DATA AND RESPOND TO CUSTOMERS FASTER.

MANUAL PROCESSING

Assembling, digesting and verifying all documentation becomes increasingly time-consuming
- Extra headcount needed to keep pace
- Labor shortages make it difficult to hire

Stressed workforce wasting time on low-value work
- Increased costs
- Employees become frustrated and demotivated

High-volume, complex documents lead to human data entry errors
- Inaccurate information slows operations

Data in siloed systems fragments the history of your product and shipments
- Disorganized or incomplete documentation

Multiple queries and lack of visibility reduce customer responsiveness
- Customer relationships damaged

INTELLIGENT AUTOMATION

Leverage AI to ingest structured or unstructured data from any type of document arriving in different formats or from different sources
- Immediately verify received documents

Process large quantities of complex data at speed
- Scale quickly without reliance on headcount
- Eliminate human error

Match incoming documents to the right shipment, purchase order or ERP record instantly
- Missing data? Flag to a human worker for immediate correction so operations never halt

Build an automatically updated central repository of product and shipment history
- Full visibility of all products in an organised digital ecosystem

Improve customer responsiveness by up to 80%
- Smooth operations strengthens customer relationships

Geo-political issues can have enormous impact on transportation and business continuity, forcing companies to break into new supply chain regions and work with new suppliers

A single freight shipment can require up to **10** different documents to be completed

Brexit caused an **80%** increase in the number of custom forms required

Global labor shortages are making it difficult to keep up with increased documentation at pace, causing a global fall in suppliers' on-time delivery rates
