

# The 10 key benefits of Accounts Payable Automation

## Improved Accuracy

Human error is one of the costliest problems associated with processing invoices manually.

## Recognizable Cost Savings

Cost per invoice processed is a critical KPI for your business. With manual processes, each invoice could cost \$10 or more to process, especially when there are errors or exceptions to resolve.

## Improvements in Time Efficiency

Invoice cycle time is often also a casualty of manual processes.

## Easier Compliance and Monitoring

Ensuring that your team follows the correct approval process and pays only legitimate invoices is a critical task.

## Better Data Visibility and Insight

At the same time that automation simplifies the compliance process, it also unlocks fresh insights for the business.

## Improved Customer Satisfaction

When you need assistance in a pinch, a reputation as a preferred partner can be beneficial.

## More Cooperative Teamwork

Put the spark of life back into your department and enable teams to work together more effectively.

## The Opportunity to Personalize and Streamline Your Process

Consolidating workflows does more than improve opportunities for excellent teamwork.

## The Chance to Grow, Plan and Monitor

Gain insights that make planning for the business's next growth phase easier."

## Integrations With the Rest of the Business

AP has traditionally been a highly siloed environment. Integration with enterprise resource management software generally makes the AP process more visible to key decision makers
